Simply Better EHR, Practice Management, Revenue Cycle, and Credentialing Solutions.

Why is Lytec 2017 the Best Choice for Your Practice?

Accounts Receivable Tracking Tool.

Offers practices the ability to drill down into their Patient and Insurance accounts receivable and follow up on any outstanding claims or statements. The drill down functionality will make it easy for your practice to work the AR and assign different collection tasks to your staff based on the condition of the receivables. With customizable views that can be saved, each staff member can have a different view that represents their work list for the day. You can filter the AR Tracking tool by many different values in order to narrow the scope of your work to only those claims or statements that you are working at the time.

Integrated Appointment Reminder System.

Autoremind offers practices the ability to send appointment reminders to patients with upcoming appointments. These reminders can be sent through phone calls, secure emails, and text messages. As patients confirm their appointments, your Lytec system will be updated to reflect that confirmation status. You can also use the Autoremind portal to assist as you work through the patient recall process.

*Additional Monthly Fees Apply

ICD-10 Search Tool.

Lytec 2017 includes a powerful ICD-10 search tool to help practices quickly select billable codes and avoid claim denials due to lack of specificity. The fast, physician friendly tool helps you search by codes, clinical and billing descriptions, abbreviations, and even by clicking on anatomical diagrams. It also prompts for secondary codes to support quality program reporting. Don't let your cash flow be negatively affected by the changing requirements, let Lytec 2017 help you select the right codes!
